

Name: Avanish Grampurohit
Roll Number: 2026201065
GitHub: <https://github.com/Avanishx05/student-portal>

Part 1

```
Switched to a new branch: feature
[avi@avanishs-MacBook-Air student-portal % git log --graph --oneline --all ]
* 1c605df (HEAD -> main, origin/main) initial commit - added main and set up basic gitignore for cpp programs
```

Part 2

```
[avi@avanishs-MacBook-Air student-portal % git log --graph --oneline --all ]
* ebb60da (HEAD -> main, origin/main) Corrected typos in clang and added debug instructions.
* c48cfb3 Added Run Instructions.
* 9ae689d Added Build instructions
* cddf2a4 Added instructions for cloning and remote connecting to github using ssh.
* e232e5b Fixed syntax issue for points.
* 8cc4b01 Added prerequisites needed to run the project locally.
* 93674d2 Created Readme - set up title
* 1c605df initial commit - added main and set up basic gitignore for cpp programs
```

Part 3

```
Switched to a new branch: feature
[avi@avanishs-MacBook-Air student-portal % git log --graph --oneline --all ]
* ada90b6 (HEAD -> main, origin/main) merge: Modified main to set up a cli and feature to connect components
| \
| * 9a050b3 (feature) Created a features.cpp and feature.h to manage all feature functions and modified main.cpp to set up a basic system calling feature functions where necessary.
| /
* ebb60da Corrected typos in clang and added debug instructions.
* c48cfb3 Added Run Instructions.
* 9ae689d Added Build instructions
* cddf2a4 Added instructions for cloning and remote connecting to github using ssh.
* e232e5b Fixed syntax issue for points.
* 8cc4b01 Added prerequisites needed to run the project locally.
* 93674d2 Created Readme - set up title
* 1c605df initial commit - added main and set up basic gitignore for cpp programs
```

Part 4

```

avi@avanishs-MacBook-Air student-portal % git log --graph --oneline --all
* b23f95f (HEAD -> main, origin/main) Restored src/app_features.h
* 44e13bc Testing removal on features.h
* e7b036d moved all code files inside src
* 8ddf539 accidentally changed name locally so added file app_features.h changes should be visible now
* 96eb2e5 renamed features.cpp to app_features.cpp
* ada90b6 merge: Modified main to set up a cli and feature to connect components
\
 * 9a050b3 (feature) Created a features.cpp and feature.h to manage all featrue functions and modified main.cpp to set up a basic system calling feature functions where necessary
/
\
* ebb60da Corrected typos in clang and added debug instructions.
* c48cfb3 Added Run Instructions.
* 9ae689d Added Build instructions

```

Part 5

```

avi@avanishs-MacBook-Air student-portal % git log --graph --oneline --all
* 23dd867 (HEAD -> main, origin/main, origin/HEAD) Integrated Settings
\
 * d0ac8dd (settings) feed back for no changes
* e407cdd added a display for change feedback
* bbdd1ba Implemented toggle feature in updateSettings
* 66b3079 Added profile check and skeleton for updateSettings
* 68fd6ac Implemented settings display in viewSettings
* d8cde86 Implemented profile check in viewSettings
\
 * cc8d82a Integrated Dashboard
/
\
 * 052b464 (dashboard) Added a notification setting display
* b94c158 Added a link display
* 87ff97f Removed redundant Welcome message
* 6f9ae93 Implemented a dynamic info display in dashboard
* 78db527 Implemented a login check in dashboard
* c1a3e19 Implemented a basic skeleton for dashboard
\
 * 5ea5364 Integrated profile feature
/
\
 * 937f4c2 (profile) implemented a confirm gaurdrell before actually deleting in deleteProfile
* 3b1c6f6 Implemented deleteProfile
* 015ee05 implemented viewProfile()
* 573ad6a Implemented a gaurdrell for already existing profile and success message in createProfile()
* fcb2742 implemented input for more details in createProfile()
* 8885602 added inpit and initil display for createProfile()
\
 * 248ca2a Integrated login feature
/
\
 * 514658d (login) added a clean header
* 79f69d3 implemented login attempt limiter
* e744864 implemented validation and cleaned up features.h removal
* fae1bc7 added gaurdrails for non existant profile
* 82ec484 added input and display in login()
/
\
 * 9767fc7 Created student class to store details for the functions
* 3e25b77 fixed header name features.h -> app_features.h
* 68c032f fixed empty app_features.h filled it with the right content
* b23f95f Restored src/app_features.h
* 44e13bc Testing removal on features.h
* e7b036d moved all code files inside src
* 8ddf539 accidentally changed name locally so added file app_features.h changes should be visible now
* 96eb2e5 renamed features.cpp to app_features.cpp
* ada90b6 merge: Modified main to set up a cli and feature to connect components
\
 * 9a050b3 (feature) Created a features.cpp and feature.h to manage all featrue functions and modified main.cpp to set up a basic system calling feature functions where necessary
/
\
* ebb60da Corrected typos in clang and added debug instructions.
* c48cfb3 Added Run Instructions.
* 9ae689d Added Build instructions
* cddf2a4 Added instructions for cloning and remote connecting to github using ssh.
* e232e5b Fixed syntax issue for points.

```

Part 6

```

lavi@avanishs-MacBook-Air student-portal % git log --graph --oneline --all
* 1db09a3 (HEAD -> recovery-practice) add scratch note to app_features.cpp
| * 770952c (logout) added logout feature to header
|/
* 23dd867 (origin/main, origin/HEAD, main) Integrated Settings
| \
| * d0a48dd (settings) feed back for no changes
| * e407cdd added a diplay for change feedback
| * bbdd1ba Implemented toggle feature in updateSettings
| * 66b3079 Added profile check and skeleton for updateSettings
| * 68fd6ac Implemented settings display in viewSettings
| * d8cde86 implemented profile check in viewSettings
* | cc8d82a Integrated Dashboard
| \ \
| * | 052b464 (dashboard) Added a notification setting display
| * | b94c155 Added a link display
| * | 87f9f7f Removed redundant Welcome message
| * | 6f9aa93 Implemented a dymanic info display in dashboard
| * | 78db527 Implemented a login check in dashboard
| * | c1a3e19 Implemented a basic skeleton for dashboard
| | /
* | 5ea5364 Integrated profile feature

```
